Dear Judge Neal,

Following up on our meeting of Wednesday June 23, 2021, CC Water has submitted two projects to the PADD Water Management Council for consideration by Kentucky Infrastructure Authority. Both are outside the corporate limits of Calvert City.

The first, Mulberry Lane Replacement was submitted at \$141, 180. This project is a required infrastructure project. It was submitted on it's own as a potential candidate for funding.

Second is PB Cloud Water Main Interconnect at \$454,000. This one is a key improvement to the service for our entire Possum Trot service area, improving reliability and redundancy. It also opens service to 11 households (currently without water service) in the immediate area of PB Cloud Road.

We cannot complete the second project without the first. I appreciate the support and am hopeful that these projects can be funded through ARPA should we not receive priority through KIA.

Best Regards,

A handwritten signature in cursive script that reads "Gene Colburn".
