Be it ordained that the Marshall County Fiscal Court:

#### SECTION 1:

The General Assembly of the Commonwealth of Kentucky enacted KRS 68.005 in 1978 for the purpose of promoting efficient administration of County government. KRS 68.005 requires the Fiscal Court to adopt a County Administrative Code which includes, but is not limited to, procedures and designation of responsibility for the following:

- (1) General administration of the office of County Judge/Executive (hereinafter 'County Judge'), County administrative agencies and public authorities;
- (2) Administration of County fiscal affairs, including budget formulation; receipt and disbursement of County funds, preparation of records required for the County audit, and for filing of claims against the County;
- (3) Personnel administration, including description and classification of non-elected positions, selection, assignment, supervision and discipline of employees, employee complaints and the County affirmative action program;
- (4) County purchasing and award of contracts;

The County Judge, as the Chief Executive Officer of the County, is responsible for the organization and management of the administrative functions of County government. The Fiscal Court sets the County's policies and priorities. The County Judge must execute these policies and priorities. The state law provides only general guidance as to the form and substance of a County's internal administrative organization. For this reason, the Marshall County Fiscal Court enacts the following County Administrative Code.

Marshall County Fiscal Court does hereby establish a County Administrative Code; dividing the administrative service of Marshall County into departments under the County Judge; prescribing administrative policy and procedure; prescribing the function and duties of administrative units and officials of the government; prescribing the administration of fiscal affairs and procurement procedures; and prescribing for the delivery of County services.

#### SECTION 2:

All Constitutional Officers may create an Administrative Code specifically for their office. This Code must be submitted to the Office of the Judge/Executive every June and reviewed on an

annual basis. Any changes to this Code must also be submitted to the Office of the Judge/ Executive at the time the change was made. All employees of the office must also be notified of the change and written proof of receipt must be maintained in the employee's personnel file.

If a Constitutional Officer decides not to adopt a specific Code for their office, that office shall adopt this Code and follow the policies and procedures herein.

#### SECTION 3:

The provisions of this ordinance are severable and if any provision or part thereof shall be held invalid or unconstitutional or inapplicable to any person or circumstance, such in validity, unconstitutionality or inapplicability shall not effect or impair the remaining provision of this ordinance.

To avoid conflicts with the County's operating schedules and needs, notification must be given in advance of vacation time usage. No employee shall be permitted to accrue vacation time in excess of two-hundred and forty (240) hours at any given time.

Any such exceptions to this policy shall be recorded in the Human Resource Department and notification given to the Fiscal Court.

## SECTION 5.24 Sick Leave

A. Sick leave is a benefit, not a right. Paid sick leave entitles employees to time off to recuperate from illness or accident, while retaining their employment rights

and pay for the time off. Its main purpose is to provide income for employees absent a relatively short time because of personal illness or injury. This time is not to be used as extra vacation. Full time employees will be credited with eight (8) sick leave hours for each month of employment. Full time employees are eligible to use accrued sick days after successfully completing thirty (30) days of employment. Exceptions to this policy may be authorized upon recommendation of the department head and approval of the Appointing Authority.

The "immediate family" shall include spouse, parents, grandparents, children, grandchildren, brothers, sisters, mother-in-law, father-in-law, brothers-in-law, sisters-in-law, daughters-in-law, sons-in-law, and individuals that serve as loco parentis. Adopted and step members are also included as "immediate family".
- C. Unused sick leave will carry over from year to year without a maximum limit. Because paid sick time is to be used for medical reasons, no compensation will be received for unused sick time upon termination, resignation, retirement or change in status from full-time to part-time.
- D. Paid sick time may also be used for a medical, dental, or optical examination appointment or treatment. These appointments should be scheduled outside of normal work hours if possible. If not, the employee is expected to report to work before and/or after the scheduled appointment. Paid sick time shall be used in minimum fifteen (15) minute increments.
- E. An employee must personally notify the supervisor when using sick time unless medically incapable. The notification must be made by the beginning of the shift, with the reason for and the length of absence given. The employee must personally notify the supervisor as far in advance as possible of the intention to use planned paid sick time. If making an appointment during work hours and advanced approval of the request is not received, paid sick time may not be granted.
- F. If three consecutive days of sick time are used, the department head shall notify the Human Resource Director of absence. Under certain circumstances, a written doctor's excuse may be required by the department head upon returning to work. The County may require an employee present a certification of fitness for duty exam before returning to work from a qualified professional selected by the County. Human Resources or department heads may require a doctor's excuse anytime an employee is using an inordinate amount of sick time.

- G. An employee may donate sick time to be used by a co-employee for sick time if all vacation and sick time has been used by the co-employee. For an employee to donate vacation time for a co-employee to use as sick time, a written request must be submitted to the Human Resources Director approved and delivered by the Department Head or the Appointing Authority.
- H. A department head may require the employee to submit a medical statement, period of treatment, and date that the employee may return to work from sick leave when it occurs before or after a holiday or other scheduled day off or when an employee has a record of repetitious usage of short amounts of sick leave over an extended time period. The employee may be required to take a medical examination on returning from sick leave or on such occasions that it is in the best interest of the County. The medical examination shall be given by a physician designated by the County.
- I. The County may investigate the alleged illness of an employee absent from work on sick leave. False or fraudulent use of sick leave shall be cause for disciplinary action, up to, and including termination.

# SECTION 5.25 Facility Closure

In the event that the County closes the facility at which you work, an employee may use earned paid leave to be compensated for time loss or take the time loss without pay.

## SECTION 5.26 Family and Medical Leave Act (FMLA)

- A. FMLA provides entitlement for up to 12 weeks of job protected, unpaid leave, during a fixed 12 month calendar year:
  - (1) The birth of a son/daughter or care for newborn child;
  - (2) The placement of a son/daughter for adoption or foster care;
  - (3) Care for the employee's spouse, son/daughter, or parent with a serious health condition;
  - (4) The employee's own serious health condition.
- B. Qualifying Exigency Leave. The FMLA requires that employers provide employees up to 12 weeks of leave in a 12-month period to tend to any "exigency" resulting from a service member's call to duty. The new FMLA regulations clarify that exigency leave may be taken by eligible employees (consisting of not only a spouse, son, daughter, or parent, but also "next of kin" — the next nearest blood relative) while their spouse, son, daughter, or parent is on active duty or call to active duty status in the National Guard or Reserves, or if

the family member is a retired member of the Regular Armed Forces or the Reserves. An employee whose family member is on active duty or call to active duty for the Regular Armed Forces does not qualify for this leave. Qualifying exigencies include short-notice deployment, military events and related activities, childcare and school activities, financial and legal arrangements, counseling, rest and recuperation, post-deployment activities, and additional activities.

- C. Military Caregiver Leave. An eligible employee is entitled to 26 work weeks of leave in a 12-month period to care for a covered service member in the Armed Forces (including the National Guard and Reserves) who becomes ill or injured as a result of his/her or her military service. The 12-month period begins when the employee starts using his/her leave. This leave may only be taken once per injury, but may be taken again if there are additional injuries. More than one family member may qualify for the leave.
- D. If the employee was qualified for health insurance benefits when leave begins, the employer shall maintain health benefits for the employee in the same manner during periods of FMLA leave as if the employee continued to work. The employee shall be responsible for their portion of premiums to be paid when due.
- E. The employee may exhaust all accumulated sick and vacation leave time prior to receiving unpaid FMLA leave.

F. Worker's Compensation shall be designated as FMLA leave as long as the illness or injury also qualifies as an FMLA qualifying event. If the illness or injury qualifies as FMLA leave, then FMLA runs concurrently with the Worker's Compensation Leave.

- G. Upon employee being granted FMLA leave, the employee must continue to pay his/her own employee contribution to the health insurance plan ordinarily required of an employee. The employer will continue to pay the contribution ordinarily paid by the employer under the current health insurance plan. If the employee contribution payment is not paid by the employee, in such event, the employer may terminate the health insurance benefits of the employee during FMLA leave. However, the employee may exercise their rights for COBRA benefits.
- H. In order to qualify for FMLA benefits, the employee must have worked for the employer for at least 12 months prior to the commencement of benefits and worked at least 1,250 hours in the prior year. The 12 month period need not be consecutive. Employment prior to a break in service of more than 7 years need

not be counted unless the break in service was occasioned by the fulfillment of National Guard or Reserve Military Service Obligations.

- I. Upon the employer granting FMLA leave, the employee receives an entitlement up to 12 weeks of job protected unpaid leave during any 12 month period.
- J. When the need for leave is foreseeable, the employee must give the employer at least 30 days written notice of his/her intent to receive FMLA leave benefits. If the leave is not foreseeable, the employee must provide written notice as soon as possible. The employer reserves the right to require medical certification of a serious health condition for the employee's health or a member of his/her family as defined herein. The employer may also require periodic written medical reports during the leave of the employee's health status, health status of his/her family as defined herein, as well as "fitness-for-duty" certification upon return to work from a health care provider.
- K. "Serious health condition" means an illness, impairment, injury, or physical/ mental condition that involves either:
  - (1) any period of incapacity or treatment connected with in-patient care in a hospital, hospice, or residential medical care facility, and any period of incapacity or subsequent treatment in connection with such in-patient care; or

# SECTION 5.49 Confidentiality

The County is a public agency by definition and as such is subject to full compliance with state open records laws. Accordingly, all employees are expressly prohibited from releasing any and all information that is not subject to disclosure, protected by law, contract or written agreement, or otherwise not appropriate for release. Examples of such information would include, but not be limited to, personal identity information, health information, information from businesses and contractors and similar types of information. Employees shall verify the appropriateness of releasing any information with their supervisor in advance of any action. Any open records request shall be forwarded to the County Attorney immediately.

# SECTION 5.50 Drug Free Workplace

A. The Fiscal Court has determined that a comprehensive and effective drug use education, training, control and testing program will deter drug abuse and aid in

ensuring a work environment that is as productive and as safe as possible to all employees and to the public. Abuse of drugs and use of illegal drugs is dangerous to employee health and safety and, in many cases, dangerous to the public as well. Drugs can interfere with an employee's effectiveness on the job and with clear and quick thinking. The effects of drug abuse linger and fester.

In addition, the Federal Highway Administration (FHA) has issued regulations which require that mandatory alcohol testing procedures be applied to all County employees subject to Commercial Driver License (CDL) testing and licensing procedures.

B. To accomplish the broad goals noted above the Marshall County Fiscal Court hereby declares its intent to establish a drug free workplace. The primary objective to accomplish this goal will be the promulgation and administration of a comprehensive drug free workplace policy that is attached to this Administrative Code and adopted by reference.

Alternatively, the employee may drive his/her own vehicle and receive mileage at the federal rate for miles traveled at the discretion of the department head.
  - (4) Air Fare: Lowest coach fare. County Judge or Appointing Authority approval required.

- (5) Other Expenses: Tolls, parking and similar expenses. Expenses shall be necessary and reasonable. The County will not reimburse any expenses relating to the consumption of alcohol or tips.

After review by the County Treasurer the paperwork shall be forwarded to the County Judge's Office for review.
- D. Approval of the Annual Budget does not constitute permission for departments to make purchases. Factors such as cash flow and deposits on hand must always be considered before purchases are approved.
- E. "Blanket" purchase orders may be issued from time to time by the County Judge as necessary. Blanket purchase orders may be issued to facilitate a particular department's purchasing needs. A blanket purchase order shall give a department head the ability to purchase materials or supplies from a particular vendor, up to a dollar limit and for a time period specified by the County Judge.

If sole source procurement is required, the department head must submit a written explanation about why no other would be suitable to meet its needs. The County Judge shall make the final determination that the procurement is a sole source.

# Marshall County Fiscal Court Information Systems Usage Policies and Procedures

# Preamble

Most of Marshall County's financial and administrative information is accessible through the network. As such, this information is vulnerable to security breaches that may compromise confidential information and expose Marshall County to losses and other risks. At Marshall County, security is critical to the physical network, computer operating systems, and application programs and each area offers its own set of security issues and risks.

Confidentiality and privacy, access, accountability, authentication, availability, network maintenance, and an Information Technology system are components of a comprehensive security plan. This plan identifies key concerns and issues faced by the Marshall County Fiscal Court community at the application, host, and network level, and strive for a balance between the County's desire to promote and enhance the free exchange of ideas and its need for security of critical information and systems.

This document will:

- 1. Identify the elements of a good security policy;
- 2. Explain the need for Information Technology security;
- 3. Specify the various categories of Information Technology security;
- 4. Indicate the Information Technology Security responsibilities and roles; and
- 5. Identify appropriate levels of security through standards and guidelines.

This document establishes an overarching security policy and direction for the Marshall County Fiscal Court. All departments are expected to follow the established standards, guidelines, and operating procedures.

# 1. INFORMATION TECHNOLOGY SECURITY ELEMENTS

The elements of a good security policy include:

Confidentiality and Privacy Access Accountability Authentication Availability Information technology system and network maintenance policy **Confidentiality** refers to the County's needs, obligations and desires to protect private, proprietary and other sensitive information from those who do not have the right and need to obtain it.

**Access** defines rights, privileges, and mechanisms to protect assets from access or loss.

*Social Media* defines use and responsibility of use of social media sites.

**Accountability** defines the responsibilities of users, operations staff, and management.

Authentication defines method of proving network users and use of encryption.

**Availability** establishes hours of resource availability, redundancy and recovery, and maintenance downtime periods.

*Information Technology Systems* describes the computer structure and flow of data.

**Network Maintenance** describes how both internal maintenance personnel and external vendors are allowed to handle and access technology.

# 2. NEED FOR INFORMATION TECHNOLOGY SECURITY

Systems (hardware and software) designed primarily to store confidential records (such as the Financial Information System) require enhanced security protections and are strategically controlled systems to which *access* is closely monitored. Networks provide connection to records, information, and other networks. Guidelines for appropriate use of computer facilities and services are as follows:

# A. Respect the rights and sensibilities of others

- 1. Electronic mail should adhere to the same standards of conduct as any other form of mail. Respect others you contact electronically by avoiding distasteful, inflammatory, harassing or otherwise unacceptable comments.
- 2. Others have a right to know who is contacting them.
- 3. Respect the privacy of others and their accounts. Do not access or intercept files or data of others without permission. Do not use the password of others or access files under false identity.
- 4. Distribution of excessive amounts of unsolicited mail is inappropriate.
- 5. While the Marshall County Fiscal Court encourages respect for the rights and sensibilities of others, it cannot protect individuals against the existence or receipt of materials that may be offensive to them. Those who make use of electronic communications may come across or be recipients of material they find offensive or simply annoying.

# B. Be aware of the legal implications of your computer use

- 1. The Internet enables users to disseminate material worldwide. Thus the impact of dissemination on the Internet is often far broader than that of a statement made on paper or in routine conversation. Keep in mind that a larger audience means a greater likelihood that someone may object with or without legal basis.
- 2. Much of what appears on the Internet is protected by copyright law regardless of whether the copyright is expressly noted. Users should generally assume that material is copyrighted unless they know otherwise and not copy or disseminate copyrighted material without permission. Copyright protection also applies to much software, which is often licensed to the Marshall County Fiscal Court with specific limitations on its use. Both individual users and the County may, in some circumstances, be held legally responsible for violations of copyright.
- 3. Many other state and federal laws, including those prohibiting deceptive advertising, use of others' trademarks, defamation, violations of privacy, and obscenity apply to network-based communications.

# C. Respect the mission of the Marshall County Fiscal Court in the larger community

- 1. The County makes Internet resources available to approved staff to further the County's services and related missions. These resources are strictly available only for County-related activities.
- 2. The County Information Technology (IT) Department attempts to filter the content of web pages, electronic mail, but is not responsible for the views expressed by individual users or outside entities, religious or political groups. Use computer resources lawfully.
- 3. Remember that you are responsible for all activity involving your account. Keep your account secure and private. Do not use identifying data or common words as a password; your password should be difficult to crack or otherwise guess either by individuals or by sophisticated computer programs.
- 4. The County is the custodian of a wide array of personal and financial data concerning its staff as well as the Marshall County Fiscal Court itself. Respect the County's obligations of confidentiality as well as your own. Only those with authorization may access, communicate or use confidential information.
- 5. The County has a right to expect that computer users will properly identify themselves. Computer accounts are assigned and identified to individuals. Don't misrepresent yourself.

# D. Do not harm the integrity of the Marshall County Fiscal Court's computer systems and networks.

- 1. Today's information technology is a shared resource. Respect the needs of others when using computer and network resources. Do not tamper with facilities and avoid any actions that interfere with the normal operations of computers, networks, and facilities.
- 2. Avoid excessive use of computer resources. They are finite and others deserve their share. Chain mail, junk mail, and similar inappropriate uses of County resources are not

acceptable. Web pages that are accessed to an excessive degree can be a drain on computer resources and, except where significant to the County's mission, may result in a permanent suspension of the Internet access privilege. Although a respect for privacy is fundamental to the County's policies, understand that almost any information can in principle be read or copied; that some user information is maintained in system logs as a part of responsible computer system maintenance; that the County must reserve the right to examine computer files, and that the County may be compelled by law or policy to examine even personal and confidential information maintained on County computing equipment.

- 3. You are granted privileges and responsibilities with your account. While these vary between groups, the use of County resources for personal commercial gain or for partisan political purposes (not including the expression of personal political views, debate and the like) is inappropriate and possibly illegal.
- Individual County computer systems have varying resources and demands.
   Some have additional and sometimes more restrictive guidelines applicable to their own user.
- 5. All County codes of conduct apply to information technology as well as to other forms of communication and activity.
- 6. Information Systems employees are empowered to suspend some or all privileges associated with computer use in cases of misuse or threat to the integrity of all or part of the County's information management resources.
- 7. Before any permanent action is taken against a user, the user will be advised of the bases for the proposed action and given an opportunity to respond. Concerns about such actions may be raised through the usual administrative channels associated with the department or resource in question.
- 8. Where a violation of County's policies or applicable law appears to warrant action beyond a suspension or elimination of computer privileges, the matter may be referred to a supervisor, administrator or disciplinary body with appropriate authority or to law enforcement authorities.
- 9. Complaints or concerns about another's use of County's computer resources should be directed to the administrator responsible for the facility or resource in question.

# 3. SECURITY CATEGORIES

This policy applies to the following categories of security:

- **Computer system and applications security**: Central processing unit, peripherals, operating system and data.
- **Physical security**: The premises occupied by the Information Technology personnel and equipment.

- **Operational security**: Environment control, power equipment, operational activities.
- **Procedural security**: Established and documented security processes for information technology staff, vendors, management, and individual users.
- **Network security**: Communications equipment, personnel, transmission paths, and adjacent areas.

# 4. INFORMATION TECHNOLOGY SECURITY RESPONSIBILITIES AND ROLES

# Responsibility for guaranteeing appropriate security for data, systems, and networks is assigned to Information Technology Department, County Administration, and Department Heads.

In many cases, responsibility for designing, implementing, and maintaining security protections will be delegated to information technology staff, but the individual department heads will retain responsibility for ensuring compliance with this policy. In addition to management and information technology staff, the individual user is responsible for the information technology equipment and resources under his/her or her control.

At the Marshall County Fiscal Court, the Information Technology Director is responsible for:

- 1. Tracking technology and regulatory changes that may indicate or require a change or addition to the current policy;
- 2. Advising affected department head and staff of said changes;
- 3. Establishing procedures that support the implementation and maintenance of the security policy;
- 4. Assisting departments within the County to develop, implement and maintain their own security policies that support and facilitate the County's policy; and
- 5. Establishing and maintaining a repository for the County's collected security documents.

# INFORMATION TECHNOLOGY STANDARDS AND GUIDELINES

# Confidentiality and Privacy

The Marshall County Fiscal Court and all members of the County community are obligated to respect and, in many cases, to protect confidential data. There are, however, technical and legal limitations on our ability to protect confidentiality. For legal purposes, electronic communications are no different than paper documents. Electronic communications are, however, more likely to leave a trail of inadvertent copies and more likely to be seen in the course of routine maintenance of computer systems. The County monitors the content of personal web pages, e-mail or other on-line communications. The County reserves the right to examine computer records or monitor activities of individual computer users for the following reasons: (a) to protect the integrity or security of the computing resources or protect the County from liability, (b) to investigate unusual or excessive activity, (c) to investigate apparent violations of law or County policy, and (d) as otherwise required by law or exigent circumstances. In limited circumstances, the County may be legally compelled to disclose information relating to business or personal use of the computer network to authorities having legal jurisdiction or, in the context of litigation, to other third parties.

# Access

No one may access confidential records unless specifically authorized to do so. Even authorized individuals may use confidential records only for authorized purposes. The County's Computer Use Policy requires that members of the County community respect the privacy of others and their accounts, not access or intercept files or data of others without permission, and not use another's password or access files under false identity. Violators of any of these rules are subject to discipline consistent with the general disciplinary provisions.

Technology assets are to be housed in an appropriately secure physical location. Technology assets include servers, personal computers that house systems with controlled access (laptops are a category of special consideration), ports (active ports in public areas), sniffing devices (PC's set up to do this for diagnosis should be secure), modems and network components (cabling, electronics, etc.).

Passwords help protect against misuse by seeking to restrict use of County systems and networks to authorized users. Each authorized user (specific individual) is assigned a unique username and password that is to be protected by that individual and not shared with others, is difficult to crack, is changed on a regular basis, and is deleted when no longer authorized.

The management for each area will ensure that controls are in place to avoid unauthorized intrusion of systems on the network and to detect efforts at such intrusion. Such controls may include some combination of the following: setting up base-line traffic monitoring and comparing with network logs for variances; implementing system control mechanisms to detect unexpected data conditions; monitoring successful and unsuccessful access to data; and, conducting port scans to ensure that only authorized users are connected to the network.

# Requesting Network/User Access

Employees shall be given access on an as-needed basis. An Employee's Department Director and the Information Technology Director must approve a "Request for Access" before the employee is added or access to data is allowed or modified.

- a. Department Director will make a "Request for Access" to the Information Technology Director.
- b. Information Technology Director verifies the request and either approves or rejects the request. Rejected requests will be explained to the requesting Director.
- c. Information Technology will add, delete or modify the user's access rights.
- d. Information Technology will notify the Department Director upon completion of the request.

# Social Media

Including, but not limited to Facebook, Twitter, LinkedIn, and YouTube.

The following activities are deemed inappropriate uses of social media: Use of social media for illegal or unlawful purposes, including copyright infringement, obscenity, libel, slander, fraud, defamation, plagiarism, harassment, intimidation, forgery, impersonation, and computer tampering (e.g. spreading Spyware, malware, viruses, etc.).

You are responsible for what you post. # Accountability

Individual users are responsible for ensuring that others do not use their system privileges. In particular, users must take great care in protecting their usernames and passwords from eavesdropping or careless misplacement.

Passwords are never to be 'loaned.' Individual users will be held responsible for any security violations associated with their usernames.

Operations staff is responsible for reviewing the audit logs and identifying potential security violations. The operations staff is responsible for establishing the security and access control mechanisms (such as usernames, passwords, logging, etc.) and may be held accountable for any security breaches that arise from improper configuration of these mechanisms.

Each user permitted to access a controlled system is to be made aware of the access policy for that system. Management will provide this information to the employee when first granting access and make the employee aware of the auditing capability in place to verify compliance.

All controlled systems must maintain audit logs to track usage information to a level appropriate for that system. All user sessions and all failed connection attempts must be logged. For user sessions, the following will be recorded: user, source IP, session start time/date, and session end time/date. For failed connection attempts, the number of attempts must also be recorded. Management has the discretion to determine whether additional logging is necessary.

Audit logging may also apply to networks. Logging of network traffic flow and access is a standard practice. If inappropriate use of the network is suspected, and/ or management so requests, the Information Technology Director may authorize specific traffic logging on portions of the County network.

If the operations staff believes a security incident has occurred, they will immediately notify their management. Management will assess the potential implications of the incident, notify the Information Technology Director, and take any remedial and necessary action. All audit logs will be immediately duplicated and moved to secure media for further analysis.

Before adding new software to County computers and networks, system defaults should be carefully reviewed for potential security holes and passwords shipped with the software should be changed. Downloading software, particularly software that is not job-related or endorsed by the administration, may introduce security risks and is strictly prohibited.

# Authentication

Authentication and data encryption or point-to-point communication will be implemented for all systems that send or receive sensitive data or when it is critical that both parties know with whom they are communicating. The decision of whether to encrypt data should be made by the professional system administrator responsible for the particular application being distributed, with the knowledge of the County Information Technology Director, County Judge, or department head.

# Information Technology Systems and Network Maintenance

In the course of doing business, Marshall County Information Technology will require various levels of repair, general maintenance, and monitoring. All aforesaid activities will be the responsibility of the Marshall County Information Technology Department and staff. In instances where outside contractors are used, representatives of these contracted companies must follow all County IT policies.

# **Reporting Violations**

All users and/or department heads of County systems and resources have the responsibility to report any apparent violations of law, County policy, or department policy to local management and Information Technology whenever such violations come to their attention.

Department management and users of the systems are required to report security violations. Accordingly, guidelines will provide specific guidance on what, when, where, to whom, and within what timeframe the violation should be reported and a copy will be filed with Information Technology Director.

#### End-User Good Practices Policy Personal Hardware and Software Prohibited:

No personal hardware or software is allowed. All equipment, and software of any kind, including programs, is the sole property of the Marshall County Fiscal Court. This is to reduce problems of equipment and software failure, damage to data files and the introduction of viruses. It is also a policy that disks, tapes, or portable media belonging to the County are not to be used in personal home computers and then returned. This restricts access to Marshall County's data and/or programs and prevents virus transmission.

# Desktop:

The primary user of each desktop computer, laptop, or wireless handheld is responsible for maintaining data integrity. Employees shall adhere to the following procedures for physical security of software and diskettes:

- a. Identify the contents of all diskettes by using fiber-tip pens only.
- b. Use licensed software only as allowed by the software license agreement.
- c. Desktops should be locked or logged off at the end of each workday.

# Workstation Backup:

Information Technology insists that all critical data be stored on a file server. If critical data must be stored on the PC instead of on the File Server, the employee is responsible for backing up critical data files and for ensuring that backup media is stored in a safe place, preferably off-site.

# Virus Prevention:

The Information Technology Department will initiate control procedures to regularly run virus detection programs on personal computers and file servers used to store confidential or sensitive information or that run critical applications. To reduce the threat of computer viruses affecting our resources, employees should adhere to the following procedures:

- a. All desktop computers or laptops purchased with software, or received by another means, with software already loaded, should be scanned for viruses before use or connection to the network.
- b. All desktop computers or laptops where hardware is replaced or sent to a vendor for repair should be scanned for viruses before reuse or connected to the network.
- c. All software, including shrink-wrapped, shareware, or freeware, should be scanned for viruses prior to being loaded onto a desktop computer or laptop.

The County wishes to promote the responsible use of telephones and wireless communications devices, and to provide guidance for the use of such devices in compliance with federal regulations. This mobile device policy applies, but is not limited to, all devices and accompanying media that fit the following classifications:

- Telephones
- Smartphone
- Other mobile/cellular phones
- Tablets
- Laptop/notebook computers

While the County provides telephones and wireless communications devices, it also desires that use of these devices be cost-effective and properly managed. This policy details responsibilities of both employees and departments with regard to the use of telephones and wireless communications devices.

## Assumption of Privacy

The Marshall County Fiscal Court reserves the right to monitor all County phone lines to: (a) keep track of productivity and/or to monitor the quality of customer service, ("quality assurance"), (b) act upon reasonable suspicion that a County employee is engaging in unauthorized use of County equipment. This section serves as formal notification of such intent as per KRS 526.101.

Marshall County Fiscal Court employees do not have a right, nor may they have an expectation, of privacy while using any Government office equipment at any time, including the utilization of phone equipment. Any use of County communications resources is made with the understanding that such use is generally not secure, is not private, and is not anonymous.

# Security and Conduct

The end user should exercise discretion as to who has access to his/her cell phone number as there could be a charge associated with the telephone use regardless of whether the communication is incoming or outgoing.

Marshall County Fiscal Court employees have an obligation to use their wireless communications services in a responsible, informed and safe manner; conforming to network etiquette, customs, courtesies, safety practices and any applicable laws or regulations.

Employees using wireless communications devices are responsible for securing them at all times. All losses shall be reported immediately to the designated departmental representative.

#### Hardware and Support

The Information Technology Department reserves the right, through policy enforcement and any other means deemed necessary, to limit the ability of end users to transfer data to and from specific resources on the County network or the Internet.

Users will make no modifications to the hardware or software that change the nature of the device in a significant way (e.g. replacing or overriding the operating system, jailbreaking, rooting) without written approval of the IT Director.

## Policy Non-Compliance

Failure to comply with the TELEPHONE/WIRELESS COMMUNICATION and MOBILE DEVICE ACCEPTABLE USAGE POLICY may, at the full discretion of the Marshall

County Fiscal Court, result in the suspension of any, or all technology use and connectivity privileges.

# OPEN-RECORDS MANAGEMENT POLICY

### I. Introduction

## Open-Records Management Policy in Marshall County: E-Mail

The use of Electronic Mail (E-Mail) for conducting government business in Marshall County is widely recognized as an invaluable tool. The broad use of electronic communication by Marshall County includes: memo distribution, circulation of draft documents, dissemination of county directives, transferring of official documents, sending and receiving of external correspondence, and support of various aspects of county operations. Full implementation of governmental E-Mail systems expedites business communications, eliminates traditional forms of paperwork, and automates routine office tasks.

Electronic mail may be subject to open records requests, thus users should not have inappropriate expectations of privacy and informality with regard to electronic communications. Furthermore, proper in-place policy in compliance with state and/or county ordinances is imperative for effective management. In the course of use, electronic mail may be destroyed inappropriately; or it may be accumulating in systems when it should more properly be destroyed after it no longer has value to the county. Case law exists illustrating that electronic mail is discoverable under actions brought against the governmental entities and accordingly its inappropriate retention therefore brings risk.

## II. Definitions

The very term "E-Mail" is ambiguous in its meaning because it is used to mean both the E-Mail system and the messages distributed by the system. It can also be used to describe the action of sending or receiving an E-Mail message. For the purposes of this document, the word "E-Mail" is distinguished by the following terms:

*E-Mail systems* are the applications that enable users to compose, transmit, receive, and manage, text and/or graphic E-Mail messages and images.

**E-Mail messages** are any communication supported by E-Mail systems for the conduct of official County business internally, between other governmental entities, and externally with vendors, clients, citizens, and others. This definition applies equally to the contents of the communication, the transactional information associated with each message, and any attachments to the body of the message.

**E-Mail server** is the physical hardware on which the E-Mail application resides. This server is housed and physically managed by the Marshall County Information Technology Department. Messages stored on this server, however, belong to Marshall County. **Any** 

open records requests for messages stored on these servers will be forward to the County Attorney and submitted to Information Technology for immediate processing. In accordance with good management practices, the server(s) containing electronic communication will be backed up on a routine basis as to assure preservation with retention guidelines.

**Transactional information** is information about the E-Mail message. It can include the name of the sender and all recipients, the date and time the message was created and sent, the host application that generated the message, and all of the systems and computers the message was routed through. Some or all of this metadata may or may not be a visible part of the message. The federal courts have ruled that this information is a vital part of the message itself and is an important consideration when storing email messages.

## III. Managing E-Mail Messages as Public Records

E-Mails as with traditional forms of paper are business communications, thus they are subject to audit, open records request, and legal examination through discovery motions and/or subpoena. Messages sent or received in the normal course of business are classified "government record" and therefore must be retained and managed as long as they are needed for administrative, legal, fiscal, or archiving purposes. If a message is county-related, then the proper retention period policy should be applied. If messages are of a personal nature, spam, unsolicited, i.e. unwanted advertisements, then such non-County E-Mails are of a non-record nature and should be deleted immediately.

## 1. Identification of E-Mail messages

The first step after receiving a message is to determine if it was created or received as part of the business of a government agency then establishing what kind of record the message is. While the Records Custodian should be the person coordinating the records management activities, the originator of the record, i.e., author of the message, or the recipient is usually the person who makes the initial retention decision based on the nature of the message within the scope of his/her responsibilities.

Figure 1.1 Illustrates the steps in this process.

If the message was not created or received as part of the business of a government agency, it is considered **non-record** material. Non-record material has nothing to do with the actions of the County and should be deleted immediately. Examples may include:

**Personal Messages** are those received from friends or work colleagues which have nothing to do with County business. Employees need to be reminded that the E-Mail system is provided by Marshall County primarily for work use. While a certain amount of personal material may be acceptable, abuse of the system can lead to disciplinary action and even termination. Agencies should have an appropriate use policy that addresses the timely deletion of such messages.

**"Spam"** is the term for electronic "junk" mail. It is similar to the advertising mail received at home. It is completely unsolicited and unwanted. Some spam mail can be offensive in nature and sent by hackers as a way of disrupting normal business operations. Spam is a growing problem in government E-Mail accounts. While there are tools and techniques for restricting the amount of spam received, there is currently no way to keep it out completely without interfering with the ability to receive important messages. Departments should contact the IT staff if they are receiving large amounts of spam mail.

**Unsolicited E-Mail** refers to mail that may be unwanted, but is somewhat business related, such as advertising from vendors. This could also include non work related E-Mail from coworkers such as jokes, miscellaneous news articles, non-work related announcements, etc. As with personal messages, see Marshall County Fiscal Court Information Technology Usage Policy to address the timely deletion of such non-work related email.

If the message is business related, then the message recipient should determine what type of message it is and apply the proper retention period.

# IV. Establishing Retention Value

All E-Mail messages do not have the same value to the county, and therefore do not have the same retention period. The information in the E-Mail, the reason it was created, and the administrative, fiscal, legal, and/or historical value of the E-Mail to the County determines as with any other kind of record, what kind of record the message is. The majority of E-Mail messages in most agencies are minor administrative records having only brief convenience or reference value. However, E-Mail is also used to transmit records having significant administrative, legal, research, or other value and may need to be retained long-term, and some may need to be retained permanently.

As public records, E-Mail messages are subject to the same retention requirements as the same type of record in another format or medium. This means that E-Mail messages must be retained and disposed of in the same manner as the County's other records, according to records retention schedules approved by the State Archives and Records Commission for that agency or department. Retention periods for E-Mail records will vary according to the information the messages contain and the functions the messages perform. Just as Marshall County cannot schedule all paper or microfilm records together under a single retention period, the County cannot simply schedule E-Mail as a single record series.

No record, paper or electronic, should be destroyed if it is the subject of an Open Records request and/or legal action, i.e. discovery motion, subpoena, court order, etc. Even if the retention period for the record allows for its destruction, **it must be retained until the Open Records request (including any and all appeals) and/or the legal action is completed**.

**1) Informational and reference materials** are transitory in nature. They have no meaningful value to Marshall County for documenting policy, establishing guidelines or procedures, or certifying transactions and may be destroyed as soon as they are no longer

needed. Most E-Mail messages fall into this category. Some examples of these types of messages are communications received from a professional list (not used for project development or creation of policy) or, general announcements received by all employees, such as news of an upcoming fire drill or impending building repair.

**2) Temporary records** have some documentary value to Marshall County, but do not need to be retained permanently. The retention period is determined by assessing their administrative, fiscal, or legal value. This time period may range from a few months to several years and should be defined in the agencies or departments records schedule.

These records must remain accessible for the *entire* retention period specified in the schedule. E-Mail records in this category should be managed and maintained like the rest of Marshall County's temporary records.

# V. Schedules of Retention

All business-related public records in electronic communication form, i.e. "E-Mail" or otherwise

(see Kentucky Department for Libraries and Archives – Local Records Retention Schedule for the established *"Description"* criteria) are subject to the required retention periods.

For specific agency and/or departmental retention requirements not contained within this document, please refer to KDLA's website. Each of the following does have specific retention criteria; it is advisable to consult their schedule before deleting any business-related E-Mail items to assure compliance:

- Area Development District: (http://www.kdla.ky.gov/recmanagement/schedules/ kyareadevdistrict.pdf)
- County Attorney: (http://www.kdla.ky.gov/recmanagement/schedules/ kycoattorney.pdf)

# VI. Preservation of E-Mail Records and Custodian of Record

**1. Preservation -** The Marshall County Information Technology Department has developed guidelines and procedures to incorporate E-Mail messages into their overall record-keeping systems following policies approved by the Kentucky Department for Libraries and Archives. Marshall County policy and procedures are designed to ensure that E-Mail records are appropriately preserved, secured, and made accessible throughout their established retention periods.

**2. Custodian of Record** - The County's electronic communication Custodian of Record is the Director of the Marshall County Information Technology Department. All requests for electronic materials that constitute public-record under the provisions KDLA shall be forwarded to the County Attorney and processed immediately by the Director of the Marshall County Information Technology.

## Cellular Phone Use Policy

#### General Information

The Marshall County Fiscal Court recognizes that the use of technology plays a vital role in the delivery of public services and programs in local government. Specifically, technology such as cell phones, smart phones and similar PDA devices can enhance customer service, improve agency communications, and facilitate employee productivity in the daily discharge of duties. To that end the County promotes the use of employer-provided technology that accomplishes these broad purposes.

It is the goal of the County to supply its workforce with the tools of technology in a manner consistent with the objectives as stated herein. These practices are designed to ensure accountability with appropriate use and full compliance with other applicable rules and regulations.

#### Application

This policy relating to cellular phone usage applies to any device that originates or receives phone calls, leaves messages, sends text messages, accesses the Internet, or downloads and allows for the reading of and responding to email, and has the ability to take pictures, whether the device is County-supplied or personally owned.

#### **County Owned and Supplied Devices**

An employee who uses a County-supplied device or a County-supplied vehicle is strongly discouraged from using a cell phone, hands on or hands off, or similar device while driving, whether the business conducted is personal or County-related. This includes receiving or placing calls, text messaging, accessing the Internet, receiving or responding to email,

checking for phone messages, or any other purpose related to your employment; the business; our customers; our vendors; volunteer activities, meetings, or civic responsibilities performed for or attended in the name of the County; or any other County or personally related activities not named herein while driving. Use of County owned devices for personal business should be kept to a minimum and clearly subordinate to activity related to official County business. Employees should have no reasonable expectation of privacy regarding utilization of these resources. Phone records are audited to ensure no inappropriate use has occurred. If minutes used are excessive creating additional charges to the account and/or if there are any charges for unauthorized text messaging or any other unauthorized charges, the employee will receive a bill for the additional charges and will be responsible for payment of these charges. The Treasure's Office will report such activity to the employee's department head for further review and follow up action as warranted.

#### Cell Phones or Similar Devices at Work

The County is aware that employees utilize their personal or county-supplied cellular phones during normal business hours, at the same time cell phones are a distraction in the workplace. To ensure the effectiveness of meetings and courtesy within common work spaces, employees are requested to turn all electronic communication devices to vibrate mode.

#### **Personal Cellular Phones**

While at work employees are expected to exercise the same discretion in using personal cellular phones as is expected for the use of County phones. Excessive personal calls during the workday, regardless of the phone used, can interfere with employee productivity and be distracting to others. Employees are therefore requested to minimize personal calls during regular work time where possible and to ensure that friends and family members are aware of the County's policy. Abuse of this policy may result in disciplinary action, including removal of the cell phone during work hours. The County will not be liable for any damage or the loss of personal cellular phones brought into the workplace.

#### Instant or Text Messaging

Use of a cell phone for text messaging provided by the County for personal purposes or reasons unrelated to the work of the County, is permitted only where such use is minimal. Any personal use of a cell phone, either personal or provided by the County may not interfere with the conduct of the County's business or interfere with an employee's

performance of his/her job duties. Misuse of instant or text messaging is grounds for disciplinary action up to and including termination of employment.

## Mobile Camera Phones

The County wishes to avoid any impropriety or harassment associated with the use of mobile camera phones. Therefore employees may not bring cameras, video and audio recording devices, or digital devices, such as cell phones, MP3 Players, or other electronic devices that have recording capability, to any areas where employees and visitors have an expectation of privacy, such as bathrooms, locker rooms, dressing areas, etc.;

Employees who violate this policy may be subject to disciplinary actions, up to and including employment termination.

## Section V: Drug and Alcohol Testing

A. The County currently utilizes Ensite, LLC as its laboratory of choice for the collection of urine samples in the case of testing for controlled substances, and for the administration of breathalyzer tests for alcohol concentration. Ensite, LLC is also the County's third-party administrator of choice for the random selection category of testing. Employees are selected by Ensite, LLC using a statistically valid method of selection of specific employee codes. This random testing will be reasonably spaced over a twelve (12) month period. Because of the random nature of the selection process, any employee may be tested more than once, or not at all. Once collected, all urine samples are forwarded for analyzation to a certified facility designated by the county; which is a laboratory approved by the National Laboratory Certification Program (NLCP) under the United States Department of Health and Mental Services Substance Abuse and Mental Health Services Administration (SAMHSA).

**B.** While the Marshal County Jailer is a duly elected officer of the County, the Jailer's employees are included in the Worker's Compensation Insurance Policy for the Marshall County Fiscal Court as a whole. For reasons that should be obvious to the average observer, the Marshall County Jailer must maintain a "No Tolerance" policy for the use of illegal drugs by his/her employees. Accordingly, employees of the Marshall County Detention Center who test positive for illegal drugs without a valid medical or bio-medical explanation as provided a Medical Review Officer of the Fiscal Court's choosing shall be immediately terminated.

C. The County shall administer alcohol and drug tests in circumstances which include but may not be limited to the following:

1. Pre-Employment Testing - Breath alcohol and urine drug testing shall be required of all new hire applicants after their receipt of a conditional offer of employment. After receiving the conditional offer of employment, applicants will have 48-hours in which to submit to testing at a testing facility of the County's choosing. The County requires that every newly hired employee test free of controlled substances and have a breath alcohol concentration of not more than 0.02. Each offer of employment by the County shall be conditional upon the passing of controlled substance and alcohol tests.

Refusal by any applicant for employment with the County to take the controlled substance test will result in the conditional offer of employment being withdrawn. All testing under this policy will be in accordance with Testing Protocols described elsewhere in this policy.

- a) An applicant with a confirmed positive test for controlled substances and/or alcohol in a concentration of 0.02 or greater, which is not legitimately explained to and accepted by a Medical Review Officer of the County's choosing, shall not be considered for employment.
- b) Any applicant who fails a controlled substance test shall not be considered for future employment with the County.
- c) Any applicant who refuses to take a controlled substance test shall be disqualified from future consideration for employment.
- d) Any applicant who tampers with, or attempts to tamper with, a urine specimen in any manner shall be disqualified from current and future consideration of employment with the County.
- 2. An applicant whose positive test is confirmed and upheld by the Medical Review Officer (MRO) may request that the same sample be retested at the employee's expense at a County approved laboratory.

Individuals undergoing pre-employment testing shall not begin official employment with the County until after all test results are received and shown to be negative. Upon receipt of the test result, positive or negative, the Judge/Executive or his/her designee shall inform the appropriate department head of the results.

Random Testing - Employees in a Safety Sensitive position shall be required to participate in a statistically valid, unannounced random selection process, which will subject them to mandatory drug and/or alcohol testing. This category of testing will conduct random tests for alcohol at a rate of no more than ten percent (10%) for non-federally regulated Safety Sensitive positions.

Employees holding positions in which a Commercial Driver's License (CDL) is required, must also be tested at a minimum rate of ten percent (10%) for alcohol annually to satisfy Department of Transportation (DOT) requirements. In the case of random testing for drug use, non-federally regulated Safety Sensitive positions shall be tested at a rate of no more than twenty percent (20%). Employees holding positions in which a CDL is

required, must be tested for drugs at a rate fifty percent (50%) annually to satisfy DOT requirements.

All employees in federally regulated Safety Sensitive positions shall be selected from a pool that is separate from the random selection pool for other non-federally regulated Safety Sensitive positions. The Judge/ Executive shall utilize a third party to conduct the random selection of Safety Sensitive employees, including employees holding a CDL, to be tested. This random testing shall be unannounced and will take place throughout each calendar year.

Safety Sensitive employees are selected by a third party administrator using a statistically valid, random method of selection using specific employee codes. Because of the random nature of this testing process, Safety Sensitive employees may be selected for testing more than once or not at all. Once an employee is notified that he/she has been selected for testing, the employee must proceed immediately to the testing site of the County's choosing.

Note: Employees in non-Safety Sensitive positions shall not be included in the random selection pool. However, non-Safety Sensitive employees shall be subject to testing for other reasons. Procedures and protocols for "Reasonable Suspicion", "Post Accident", "Return-to-Duty" and "Followup" testing all of which testing types are described elsewhere in this policy shall apply in their case

3. Reasonable Suspicion Testing - A reasonable suspicion test shall be based on a belief that an employee is using or has used drugs or alcohol in violation of this policy, drawn from specific objective facts and reasonable inferences drawn from those facts in light of experience, training or education. The reasonable suspicion testing shall be based upon:

a) While at work, direct observation of drug or alcohol use or of the physical symptoms or manifestations of being under the influence of a drug or alcohol;

- b) While at work, abnormal conduct, erratic behavior, or a significant deterioration in work performance;
- c) A report of drug or alcohol use provided by a reliable and credible source.
- d) Evidence that an individual has tampered with a drug or alcohol test during employment with the County;

- e) Information that an employee has caused, contributed to or been involved in an accident at work;
- f) Evidence that an employee has used, possessed, sold, solicited, or transferred illegal or illicit drugs or used alcohol while on the County's premises or while operating the County's vehicle, machinery or equipment.

The Count Judge or his/her designee shall be notified immediately of any indication of reasonable suspicion. Both the observing Department Supervisor and the County Judge or his/her representative will review the policies and procedures herein and if necessary make arrangements with a testing facility of the County's choosing to conduct reasonable suspicion drug and/or alcohol testing as soon as possible. If a representative from the Office of the Count Judge is not available, the observing Supervisor shall obtain the assistance of another County Supervisor or other credible and reliable source and together they shall complete the *Reasonable Suspicion Form*, and forward it to the County Judge. If after completing the form, it is determined that there is in fact, reasonable suspicion that the employee is under the influence of drugs and/or alcohol, the observing Supervisor or his/her designee will notify the employee and accompany him/her to the testing site.

When a reasonable suspicion test is ordered, the employee must submit to testing within 45 minutes of being notified that he/she will be tested. The observing Supervisor and/or designee shall remain at the testing site with the employee being tested, until the collection process is completed. Any employee who is tested for reasonable suspicion shall be placed on leave with pay until the results of the test are known. After submitting to the drug/alcohol test, the employee may not return to work until the results of the test are known and only then if the results are negative. Only the County Judge or his/her authorized designee may order a reasonable suspicion test.

4. Post Accident Testing - Drug and alcohol testing will be conducted following an employee's involvement in an accident on or off the County's premises while on duty, or in the course of employment for the County, which requires off-site medical attention, to be administered to a person.

An accident not necessarily requiring that off site medical attention be given to a person but which results in property damage of five hundred dollars (\$500.00) or more may be deemed a "qualifying event" for requiring post-accident testing. Drug and alcohol testing may be required of the employee(s) who were actively involved in the "qualifying event". The determination of the necessity of post- accident testing when off-site medical attention is not administered to a person shall be made solely at the discretion of the County Judge or his/her designee.

Qualifying Event Exception: Due to varying types of accident cause, all accidents categorized as a "qualifying event" may not require post-accident testing. Exceptions to the "qualifying event" for requiring post-accident drug and alcohol testing will include, but may not be limited to the following types of accidents:

- a) Injuries whose onset is cumulative or gradual such as carpel tunnel syndrome, progressive hearing loss, mental disorders, dermatitis, respiratory diseases, skin disorders, etc.
- **b)** Injuries where the employee can be completely discounted as the contributing factor (i.e. injuries caused by a third party or some other uncontrollable force or event such as weather, insects, toxic plants, etc.)
- c) Injuries where the employee can be completely discounted as the major contributing factor or those injuries occurring during physical fitness or a training event, in which the employee did everything within reason to avoid the injury accident, i.e. was performing training as instructed.

In each case, the County Judge or his/her designee shall determine the necessity of drug and alcohol testing and shall communicate such testing with the involved employee and the employee's respective department head. The Judge/Executive or his/her designee shall coordinate all required tests with the appropriate medical facilities.

An employee involved in an accident while on an out-of-town assignment, shall notify his/her Department Director or the Director's designee as soon as possible but no later than two (2) hours after the accident occurred. The department head shall notify the County Judge or his/her designee to discuss possible drug/alcohol testing requirements.

Other Qualifying Event: The Department Director or his/her designee may request controlled substance/alcohol testing when an employee caused or cannot be

completely discounted from causing a vehicular or any other type of accident in which a safety violation occurs and death, serious bodily injury or major property damage did result or could have resulted. The County Judge or his/her authorized designee along with the employee's Supervisor, will be responsible for determining whether a safety violation has occurred. In each case, the County Judge or his/her designee shall determine the necessity of drug and alcohol testing and shall communicate such testing with the involved employee and the employee's department head. If a post accident controlled substance/alcohol test is required, a confirmed positive test may result in the employee's immediate termination.

**5.** Return-To Duty Testing - In all cases, it shall be at the discretion of the County Judge, subject to all applicable laws and regulations, as to whether to allow an employee who has violated any provision of this policy to continue in the County's employment. In view of the fact that the use of illegal drugs is a violation of established law, employees who test positive for drugs without a valid medical or bio-medical reason as verified by a Medical Review Officer of the County's choosing, may be immediately terminated.

In the event that an employee who has tested positive for alcohol without a valid medical reason for a positive test, as confirmed by a Medical Review officer of the County's choosing, is allowed to enter a controlled substance/ alcohol abuse rehabilitation program, the employee may be allowed to return to work only under the following circumstances:

- a) The employee may resume regular duties only after the employee tests negative in an alcohol and/or controlled substance test administered by the County-approved laboratory and can provide a release to return to work from an appropriate substance abuse treatment facility or confirmation of continued and on-going participation in a County recognized substance abuse assistance program. An employee must test negative within a reasonable period of time from receipt of the initial test results not to exceed forty-five (45) days. Any repeat occurrence of substance abuse or violation of any other aspect of the County's Drug Free Workplace Policy will result in immediate termination.
- b) Prior to returning to work, the employee shall be required to meet with the Judge/Executive or his/her authorized designee to receive an explanation of the terms of continued employment; and to sign a written *Return-to-Work Agreement*, detailing the terms under which the employee will be allowed to return to work.

Such agreement shall stipulate that the employee, at the County's request, may be required at any time, to submit to interviews and/or evaluation by the professional staff at an appropriate chemical dependency treatment facility approved by the County's Employee Assistance Program (EAP). The return-towork agreement will also stipulate that the employee be required to submit to unannounced controlled substance and/or alcohol testing for up to twelve (12) months after resuming duties.

**6.** Follow-up Testing - Any employee returning to work from successful completion of an Employee Assistance Program (EAP) treatment program for alcohol-related problems, or an alcohol rehabilitation program, shall be required to undergo one (1) year of quarterly drug and alcohol testing. The frequency of the follow-up testing shall consider recommendations of any involved Substance Abuse Professional (SAP) but shall be not less than once per quarter (every three months) for at least one (1) year. All follow-up testing may be requested at any time and shall be unannounced.

## **D.** Testing Protocol

c)

The collection of samples and administration of drug and alcohol tests shall follow all standards, procedures and protocols set forth by the U.S. Department of Health and Human Services Substance Abuse and Mental Health Administration (SAMHSA). Test results will be obtained by a qualified laboratory as defined elsewhere in this policy and results shall undergo a medical review as follows:

**1.** All test results shall be submitted for medical review by a Medical Review Officer (MRO) of the County's choosing, who shall consider the medical history of the employee or applicant, as well as relevant biomedical information.

**2.** If there is a positive test result, the employee or applicant shall be given an opportunity to report to the MRO the use of any prescription or over-the-counter medication.

**3.** If the MRO determines that there is a legitimate medical explanation for a positive test result, the MRO may certify that the test results do not indicate the unauthorized use of alcohol or a controlled substance.

**4.** If the MRO determines, after appropriate review, that there is not a medical explanation for the positive test result other than the unauthorized use of alcohol or a prohibited drug, the MRO shall refer the individual tested to the Judge/Executive or

his/her authorized representative for further proceedings in accordance with the County's Drug Free Workplace Policy.

Note: MRO determinations concerning the use of alcohol or a controlled or illicit substance shall comply with all procedures outlined in the U. S. Department of Health and Human Services (SAMHSA) "Medical Review Officer Manual for Federal Drug Testing Programs".

# E. Testing Process

- 1. Any employee who has been ordered to undergo testing for drugs and/or alcohol shall receive an Alcohol and/or Drug Testing Notification Form.
- 2. Employees shall report to the collection site of the County's choosing immediately after being provided the notification to test. In the case of reasonable suspicion testing, a supervisor or designee shall escort the employee to the collection site. Drug testing shall be conducted by urine sample while alcohol testing shall be performed using a breath alcohol testing/screening device. Drug and alcohol analysis shall be performed by a trained technician. All testing shall follow the prescribed standards, procedures and protocols set forth by the U.S. Department of Health and Human Services' Substance Abuse and Mental Health Administration (SAMHSA).
- **3.** To ensure that the test specimen is actually that of the donor, collection site staff shall require positive identification of the test subject.

- **B.** Any second offense, in which the employee's test for alcohol indicates a concentration above 0.02, is considered grounds for immediate termination.

## Section IX: Consequence of Engaging in Prohibited Conduct—Drugs

However, if such an employee is allowed to stay on the payroll, he/ she must understand that if the problem is not corrected and satisfactory job performance is not maintained, he/she shall be subject to disciplinary action which may include termination of employment. Failure to seek such assistance, or failure to abide by the terms of the treatment plan, shall be grounds for termination.
